Black Girl Magic: Powered by
creativity, courage & confidence

SHOWCASE

AUGUST 7 2026, 6PM-8PM

805 E. GENESEE ST. SYRACUSE, NY 13210

STEM FROM DANCE

STEM From Dance is a national program designed to empower young girls by providing them with coding, math, and science skillsets through performing arts. During this impactful program, girls learn about technology and choreography, build bonds with other young women and put on a live tech-infused showcase! We believe every girl has the potential to be great, and we want to help them unlock their potential.

We are on a mission to end race and gender disparity in STEM. According to the National Science Foundation, 29% of people employed in STEM fields are women, while Black, Indigenous, Hispanic, and Latina women make up just 4.87%

COMMUNITY FOLK ART CENTER

Our Vision Is to provide a high quality showcase for artists from the African Diaspora. This allows us to strengthen the dialogue and interaction among emerging, and established artists, while promoting community engagement with art.

Our mission Is to exalt cultural and artistic pluralism by collecting, teaching, and interpreting the visual and performing arts. Public programming includes exhibitions, film screenings, gallery talks, workshops and studio courses, performing and expressive arts.
